

▮ FASE 2: Contenido Dinámico - Implementación

Esta fase es la más importante porque traduce el **contenido real** de tours y testimonios. Vamos a refactorizar `packages.ts` y agregar testimonios traducidos.

1▮ Refactorizar `packages.ts`

Estrategia:

En lugar de tener texto hardcoded, usaremos **keys de traducción** que apunten a los archivos JSON.

Cambios en `client/src/lib/packages.ts`:

Busca la estructura actual de un paquete:

```
// ✖ ANTES (ejemplo de un paquete)
{
  id: "city-tour-clasico",
  name: "City Tour Clásico",
  description: "Recorrido completo por los principales puntos turísticos de Río de Janeiro",
  category: "cityTour",
  price: 150,
  duration: "8 horas",
  includes: [
    "Guía turístico profesional",
    "Transporte con aire acondicionado",
    "Entradas a los atractivos",
    "Almuerzo incluido"
  ],
  destinations: [
    {
      name: "Cristo Redentor",
      description: "Icónico monumento en el Cerro del Corcovado"
    },
    {
      name: "Pan de Azúcar",
      description: "Impresionante vista panorámica desde el teleférico"
    }
  ]
}
```

✓ **DESPUÉS (con keys de traducción):**

```

{
  id: "city-tour-clasico",
  nameKey: "tourPackages.cityTourClassic.name",
  descriptionKey: "tourPackages.cityTourClassic.description",
  category: "cityTour",
  price: 150,
  durationKey: "tourPackages.cityTourClassic.duration",
  includesKeys: [
    "tourPackages.cityTourClassic.includes.0",
    "tourPackages.cityTourClassic.includes.1",
    "tourPackages.cityTourClassic.includes.2",
    "tourPackages.cityTourClassic.includes.3"
  ],
  destinations: [
    {
      nameKey: "tourPackages.cityTourClassic.destinations.0.name",
      descriptionKey: "tourPackages.cityTourClassic.destinations.0.description"
    },
    {
      nameKey: "tourPackages.cityTourClassic.destinations.1.name",
      descriptionKey: "tourPackages.cityTourClassic.destinations.1.description"
    }
  ]
}

```

Tipo TypeScript actualizado:

Agrega al inicio de `packages.ts`:

```

export interface TourDestination {
  nameKey: string;
  descriptionKey: string;
  imageUrl?: string;
  mapUrl?: string;
}

export interface TourPackage {
  id: string;
  nameKey: string;
  descriptionKey: string;
  category: string;
  price: number;
  durationKey: string;
  includesKeys: string[];
  destinations: TourDestination[];
  images: string[];
  imageUrl: string;
  faq?: Array<{
    questionKey: string;
    answerKey: string;
  }>;
}

```

Ejemplo completo de UN paquete refactorizado:

```
{
  id: "city-tour-clasico",
  nameKey: "tourPackages.cityTourClassic.name",
  descriptionKey: "tourPackages.cityTourClassic.description",
  category: "cityTour",
  price: 150,
  durationKey: "tourPackages.cityTourClassic.duration",
  imageUrl: "/images/city-tour.jpg",
  images: [
    "/images/christ-redeemer.jpg",
    "/images/sugarloaf.jpg"
  ],
  includesKeys: [
    "tourPackages.cityTourClassic.includes.0",
    "tourPackages.cityTourClassic.includes.1",
    "tourPackages.cityTourClassic.includes.2",
    "tourPackages.cityTourClassic.includes.3"
  ],
  destinations: [
    {
      nameKey: "tourPackages.cityTourClassic.destinations.0.name",
      descriptionKey: "tourPackages.cityTourClassic.destinations.0.description",
      imageUrl: "/images/christ.jpg",
      mapUrl: "https://maps.google.com/?q=Cristo+Redentor"
    },
    {
      nameKey: "tourPackages.cityTourClassic.destinations.1.name",
      descriptionKey: "tourPackages.cityTourClassic.destinations.1.description",
      imageUrl: "/images/sugarloaf.jpg",
      mapUrl: "https://maps.google.com/?q=Pan+de+Azucar"
    }
  ],
  faq: [
    {
      questionKey: "tourPackages.cityTourClassic.faq.0.question",
      answerKey: "tourPackages.cityTourClassic.faq.0.answer"
    },
    {
      questionKey: "tourPackages.cityTourClassic.faq.1.question",
      answerKey: "tourPackages.cityTourClassic.faq.1.answer"
    }
  ]
}
```

2 Actualizar Componentes que Usan Packages

PackageCard.tsx - Usar traducciones:

```
// ✗ ANTES
<h3 className="text-xl font-bold">{tourPackage.name}</h3>
<p className="text-sm text-muted-foreground">{tourPackage.description}</p>

// ✔ DESPUÉS
import { useTranslation } from 'react-i18next';

const { t } = useTranslation();

<h3 className="text-xl font-bold">{t(tourPackage.nameKey)}</h3>
<p className="text-sm text-muted-foreground">{t(tourPackage.descriptionKey)}</p>
```

PackageModal.tsx - Renderizar includes y destinations:

```
// ✗ ANTES
<div className="space-y-2">
  {tourPackage.includes?.map((item, index) => (
    <div key={index}>
      <Check className="w-5 h-5" />
      <span>{item}</span>
    </div>
  ))}
</div>

// ✔ DESPUÉS
import { useTranslation } from 'react-i18next';

const { t } = useTranslation();

<div className="space-y-2">
  {tourPackage.includesKeys?.map((key, index) => (
    <div key={index}>
      <Check className="w-5 h-5" />
      <span>{t(key)}</span>
    </div>
  ))}
</div>
```

```
// ✗ ANTES (destinations)
{tourPackage.destinations?.map((dest, index) => (
  <div key={index}>
    <h4>{dest.name}</h4>
    <p>{dest.description}</p>
  </div>
))}

// ✔ DESPUÉS
{tourPackage.destinations?.map((dest, index) => (
  <div key={index}>
    <h4>{t(dest.nameKey)}</h4>
```

```

        <p>{t(dest.descriptionKey)}</p>
    </div>
  ))}

```

```

// ✖ ANTES (FAQ)
{tourPackage.faq?.map((item, index) => (
  <div key={index}>
    <h5>{item.question}</h5>
    <p>{item.answer}</p>
  </div>
))}

```

```

// ✔ DESPUÉS
{tourPackage.faq?.map((item, index) => (
  <div key={index}>
    <h5>{t(item.questionKey)}</h5>
    <p>{t(item.answerKey)}</p>
  </div>
))}

```

3. Archivos JSON - Traducciones de Paquetes

Agrega esta sección a **TODOS** los archivos de traducción:

client/src/lib/translations/es.json

```

5 Actualizar TestimonialCard.tsx

```

// ✕ ANTES
export default function TestimonialCard({ testimonial }: TestimonialCardProps) {
  return (
    <div>
      <p>{testimonial.text}</p>
      <h4>{testimonial.name}</h4>
      <span>{testimonial.location}</span>
    </div>
  );
}

```

```

}

// ✔ DESPUÉS
import { useTranslation } from 'react-i18next';

export default function TestimonialCard({ index }: { index: number }) {
  const { t } = useTranslation();

  return (
    <div>
      <p>{t(`testimonials.reviews.${index}.text`)}</p>
      <h4>{t(`testimonials.reviews.${index}.name`)}</h4>
      <span>{t(`testimonials.reviews.${index}.location`)}</span>
    </div>
  );
}

```

✔ Checklist Fase 2

Archivos a modificar:

- [] client/src/lib/packages.ts - Refactorizar a keys
- [] client/src/components/PackageCard.tsx - Usar t() para packages
- [] client/src/components/PackageModal.tsx - Usar t() para includes/destinations/faq
- [] client/src/components/TestimonialCard.tsx - Usar t() para testimonios
- [] client/src/lib/translations/es.json - Agregar tourPackages + testimonials
- [] client/src/lib/translations/en.json - Agregar tourPackages + testimonials
- [] client/src/lib/translations/pt.json - Agregar tourPackages + testimonials
- [] client/src/lib/translations/fr.json - Agregar tourPackages + testimonials
- [] client/src/lib/translations/it.json - Agregar tourPackages + testimonials

▮ Resultado Esperado

Después de Fase 2:

- ✔ **Todos los tours traducidos** (nombre, descripción, incluye, destinos, FAQ)
- ✔ **Testimonios en 5 idiomas**
- ✔ **~90% del sitio completamente traducido**
- ✔ Contenido dinámico funcionando perfectamente

¿Listo para la Fase 3 (detalles finales)? ▮
